

# Agile Delivery Services-18F Prototype Automation Report-Development Stack Pool

[Index](#)
[Consolidated Page](#)

The following table lists down the Sequential Steps during the Run

TestCase Name: **ADS\_SearchDrug : Iteration 1**

Time Taken for Executing: **3 Sec**

Current Run Number: **Run 335**

Method Type: **Test Method**

## Requirement Coverage/ TestCase Description

This test is mapped to 01 Search Drug Requirement JIRA Test ID- PROT-1,PROT-2

### Execution Platform Details

O.S : Windows 7, amd64Bit, v6.1  
Java : 1.7.0\_60-ea  
Hostname : Luis-PC  
Selenium : 2.45.0

### Summary

Status : Passed  
Execution Date : 07-Jul-2015 06:30:19  
Browser : firefox,v37.0.2

### Author Info

Author Name : Automation Tester  
Creation Date : 07-Jul-2015 06:30:12  
Version : 1.0  
System User : Luis

S.No	Step Description	Input Value	Expected Value	Actual Value	Time	Line No	Status	Screen shot
1	01 Module: Search Drug Adverse Event		N/A	JIRA TESTCASE-PROT-1,PROT-2	956 Milli Sec	90		
2	Enter data in the search text box	20140312	Data should be entered	Drug Event date is entered as expected	1 Sec	28		
3	Click Search button	N/A	Search button should be clicked	Search button is clicked as expected	448 Milli Sec	33		
4	Validate the functional drug event functionality	N/A	Search should be returned record details	10003302 is displayed as expected.The actual value in the page is 10003302	525 Milli Sec	59		

### Parameters:

Param: This testcase validates the system returns adverse event for the drug reported on the given date  
Param: 20140312  
Param: Search should be returned record details  
Param: 10003302  
Param: functional
